

ISO POLY FILMS, INC.

Delivering High Performance Films for Critical Applications

INDUSTRIES SERVED

- Food Packaging
- Consumer Products
- Medical Devices
- Pharmaceutical
- Industrial Applications

CAPABILITIES

ISO Poly Films is a custom extruder of high-end multi-layer plastic films for the laminating, printing, coating and converting markets. Founded in 1998, the company operates a 135,000-square foot state-of-the-art facility in Gray Court, SC, and opened its second plant in 2012 in Vancouver, Wash. The company currently operates 19 film lines, including mono-layer, three-layer, five-layer and seven-layer high-barrier coextrusion lines in its two facilities. ISO Poly produces custom-engineered films for a variety of packaging and protective film applications, including food and beverage products, medical devices, consumer electronics, pharmaceuticals and industrial products.

Certified Minority Business Enterprise and AIB Certified
