

SOUTHEASTERN PLASTICS CORP.

Custom Flexible Packaging for the Dry Cleaning,
Apparel Manufacturing and Retail Clothing Industries

INDUSTRIES SERVED

The dry-cleaning, apparel manufacturing and retail clothing industries require a wide range of flexible packaging products. Sigma Southeastern offers a variety of high quality products, such as, perforated slope shoulder garment bags on rolls, slope shoulder garment bags on rolls from 24" through 96" length, film width up to 24" face by 20" gusset. Cartons are personalized with a custom label for easy identification. All shipments are palletized and shrink wrapped to assure safety to our customers.

CAPABILITIES

Our professional sales team with over 150 years of selling experience prides itself on service to our customers; as well as our environmental awareness with our new line of eco-friendly products. Sigma Southeastern has the ability to manufacture in gauges .0004 mil up to 2 mil.

PRODUCTS

Sigma Southeastern offers one to four color flexographic printing capability, both random repeat and registered spot printing available on one or two sides. Every extruder has printing capability on sophisticated, fully-automated machinery, which represents the highest printing capacity for garment film rolls in the industry, and translates into delivery in a matter of weeks, not months. We print with environmentally acceptable water-based inks with results that display vibrant ink coverage.

QUALITY

With an emphasis on quality and service – SIGMA SOUTHEASTERN IS YOUR SOURCE.

SERVICES

Sigma Southeastern's product line for the laundry and dry-cleaning distributor trade encompasses a diverse selection of over 14 specialty items that cover virtually every packaging need. Our commitment to quality and an ongoing program of product development and expansion guarantees that Sigma Southeastern will meet the growing needs of the industry now and in years to come. Trust Sigma Southeastern's knowledgeable sales professionals to provide solutions to all your flexible packaging requirements, whether they are standard or unique.
