

POLY PLASTIC PRODUCTS OF NORTH CAROLINA

Also doing business as: Sigma Specialty Films

**Custom Sheeting, Shrink Bundling Film, Tubing,
and Custom Industrial Packaging**

INDUSTRIES SERVED

- Food (meat, poultry, dairy, snacks) and Beverage Industries
- Laminators and Converters
- Blow Molders and Injection Molders
- Pharmaceutical and Personal Hygiene Products
- Furniture & Textile Industries
- Chemical, automotive, and electronics
- Postal mailing services

CAPABILITIES

Poly Plastics utilizes a sophisticated process and advanced materials to produce superior sheeting, tubing, and shrink bundling films. This location also produces low density, linear low density, and proprietary blends of film in the fabrication of bags, sheeting, bundling film, and tubing.

PRODUCTS

- Custom sheeting, bundling films, and tubing
- Custom sizes, gauges, colors, and resin blends for industrial packaging such as carton liners, bin liners, mattress covers, and furniture covers
- Shrink pallet covers, drum liners, and printed pallet covers
- Hazardous and infectious waste bags
- Postal films (USPS Approved)

QUALITY

Our comprehensive quality control procedures guarantee reliable product consistent with your specifications. Our goal is to tailor and design packages for our patrons' needs by utilizing the most advanced materials and knowledge available.

SERVICE

Our centralized customer service department, at our Corporate offices, located in Pennsylvania, will make every effort to satisfy your needs. We pride ourselves on keeping to our commitments and give prompt responses to your inquiries. Poly Plastics continually endeavors to attain prolonged relationships by balancing Price, Service, and Quality.

POLY PLASTIC PRODUCTS OF NORTH CAROLINA

PRODUCTION CAPABILITIES

SUPER TUFF 2000 SB & SK SERIES BUNDLING FILMS

- High tensile strength and puncture resistance enables gauge reduction and cost savings
- Superior wrapping strength
- Excellent sealability
- Tailored MD shrink or preferred balanced shrink
- Excellent performance in commercial heat tunnels and with handguns

STA TITE 3000 SB SERIES

- Excellent stiffness lowers elongation after shrinking which keeps the package tighter under extreme temperatures and handling conditions
- High tensile strength will enable gauge reduction and lower per unit cost
- Runs at high speeds to reduce down time
- High MD and low TD shrink has higher holding force and excellent sealability
- Runs on all high speed single roll equipment as well as dual roll equipment

CUT RITE 4001 HG SERIES

High density Gerber cutting film

CUT RITE 5001 LG SERIES

Low density Gerber cutting film

CUSTOM INDUSTRIAL BAGS FOR COMMERCIAL PACKAGING

- In line extrusion utilizing 100% linear low (butene, hexene, and super hexene), high density, low density, and proprietary blends. Bags as small as 6" x 3" x 15" to 140" gusseted (97" lay-flat maximum) x 999"
- All colors (opaque and tinted), vent holes, UVI and EVA
- Random and registered print up to two colors

CUT RITE 5001 LG SERIES

- Produced to your specifications including COF, color, resin, size, and gauge
- Ability to produce jumbo rolls
