

MERCURY PLASTICS INC, CA

Providing custom manufactured and designed flexible packaging throughout the U.S., Canada, and Mexico.

CAPABILITIES

Mercury Plastics, Inc. is a vertically integrated custom manufacturer who extrudes mono and co-ex layer polyethylene films, is an award winning flexographic printer, producing its own digital plates, and providing form and fill rollstock as well as a variety of converted bags. In addition to blown film we offer cast film. Our capabilities also include modified atmosphere and laser perforated products. Every day, we produce more than 150,000 lbs of film and over 4 million bags.

QUALITY

Mercury Plastics is committed to manufacturing high quality flexible packaging products to meet our customer's requirements every time and meet or exceed our customer's quality and service expectations. We use our Total Quality Management program to produce the desired results in all aspects of the production and service processes. We are certified, and have been certified every year by the AMERICAN INSTITUTE OF BAKING (AIB), scoring "excellent" and "superior" for our good manufacturing practices to maintain and improve our food safety manufacturing and warehousing processes.

SERVICE

A great product without great service is incomplete and does not meet or exceed customer expectations. We at Mercury Plastics believe and practice the highest level of service to compliment our excellently manufactured products. We pride ourselves in offering industry leading lead times and moving mountains to solve customer emergencies. We work meticulously from order inception to delivery to ensure that every step is accurate, timely and as needed to create the proper results. We offer warehousing, inventory management and just-in-time deliveries to complement our direct delivery service.
